

KOMFORT LATCH®

Bringing Safety to People™

The next generation of Komfort Latch® is one of several LifeGuard Technologies® products offered by IMMI® to professional drivers and operators on the road. Komfort Latch offers a break-through in seat belt comfort and convenience by simplifying the process of safely relieving seat belt tension.

With the Komfort Latch engaged, the seat belt is allowed to extend/retract 5 to 7 inches, allowing the occupant to lean forward and make full steering wheel rotations, all without releasing the Komfort Latch.

HOW IT WORKS:

Engaging the Komfort Latch

1. Latch seat belt (visit www.clicktugsnug.com)
2. Push the yellow button to engage the Komfort Latch
3. Lean forward (about 4") until you hear a click
4. Return to normal driving position, and the latch maintains the preset amount of slack (approximately 1 inch).*

* If the vehicle experiences a sudden deceleration while the Komfort Latch is in use, the device will allow the retractor to fully lock the belt.

Disengaging the Komfort Latch

1. Unlatch the seat belt
2. Push the yellow button to disengage the Komfort Latch – OR – tug on the upper torso portion of the seat belt.

benefits

- Quick and easy to use
- Relieves seat belt tension
- Provides greater freedom of movement
- Improves seat belt comfort, leading to increased seat belt usage

About IMMI

IMMI, based in Westfield, Ind., is making the job safer with seat belt systems and advanced occupant protection products tailored for highway vehicles and off-highway equipment. Utilizing a modern crash-test facility, sophisticated engineering and advanced manufacturing operations, IMMI develops and supplies innovative, proven LifeGuard restraint systems and airbag protection for customers worldwide.
