

Upper Torso Restraints

4-Point System

5-Point System

Upper-torso restraints by LifeGuard Technologies®, a division of IMMI, are designed to keep soldiers securely in their seats and provide optimal occupant protection in a variety of accident scenarios. Three, four and five-point restraint systems all provide protection in frontal crashes, while four and five-point restraints are especially advantageous in environments with high potential for rollover. Thorough testing and durable construction means a longer field life and better endurance in the harshest conditions.

Durability

- Fully retractable and adjustable restraint configurations
- Numerous webbing configurations available
- Variety of webbing colors available
- Meets SAE J2292, FMVSS 209, FMVSS 302 military standards and other international requirements
- Robust components for military environments

Comfort

- Provides freedom of movement
- Designed to be used with LifeGuard Comfort Ride products
- Ease of use allows for quick usage and removal of restraint
